

G L O B A L
WORLDWIDE EXHIBITION CONTRACTORS

“The best measure of success is business **growth**”

We started out in 1988 in a small manufacturing unit. The original directors are still with the company and head up an operation that is now one of the

largest independent

full service exhibition contractors in the UK.

“The best measure of success is business **growth**”

“We create and have control over that creation.”

Because we take a
pride in
our work
we manufacture our
designs within our
own fully equipped workshop.
Each project is assigned our own
highly **skilled** team
of craftsmen who see the
job through from start of
construction to on-site
installation and dismantle.

quality steel fabrication
project management

Our

steel

fabrication plant enables us to include competitively priced two storey steel structures within our designs

Specialist architectural structures

can also be included to enhance the overall appearance of any project
